

# Medical Biography

For every new physician visit, it would be helpful to give them a copy of this "Medical Biography", the "Med-Minder" and "My Medical Data" sheet. For all surgeries and procedures be sure to note if your loved one had a complication such as a poor reaction to the anesthesia, pain pills or infection – be specific with exact terms so you can prevent it from happening again.

List surgery or procedure	Physician	Hospital/Clinic	Date	Complications?
